Extension Version: 1.0.0.2

Compatibility: CE 1.4.x, 1.5.x, 1.6.x, 1.7.x

Website: <http://www.easypdfinvoice.com>

Support: support@easypdfinvoice.com

I. Overview

PDF Processor is an plugin of Easy PDF Invoice extension which allow the PDF file will be processed from your server.

II. Installation

Step 1:

- Make sure the "app" and "skin" directories of your Magento and all directories inside it have full written permissions or set permissions on the each directory equal to 777 or 0777.

Important! Change all permissions back after installation.

- You can read more information about permission at http://www.magentocommerce.com/wiki/magento_filesystem_permissions

Step 2: Disable Compilation.

- Log into Magento Admin Panel and go to System → Tools → Compilation and disable the compilation.
- After last step you can run the compilation process again.

Step 3. Upload Files.

- Upload app and skin folders from the extension package to your magento root folder using an FTP client.

Step 4. Clear cache.

- Go to System → Cache Management. Clear the store cache

Step 5. Re-login.

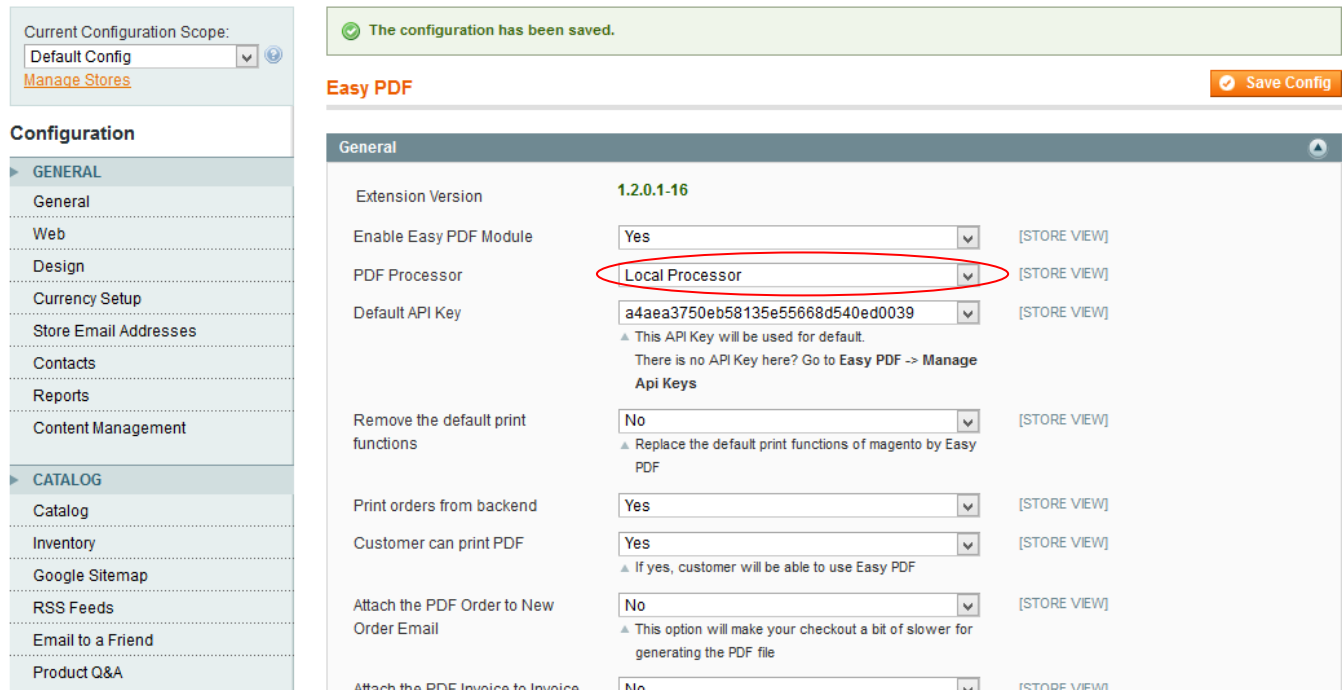

- Log out and log back into Magento Admin Panel.

You have installed PDF Pro extension. If you get any error while install extension please contact to our support team: support@easypdfinvoice.com

Need Help ?

```

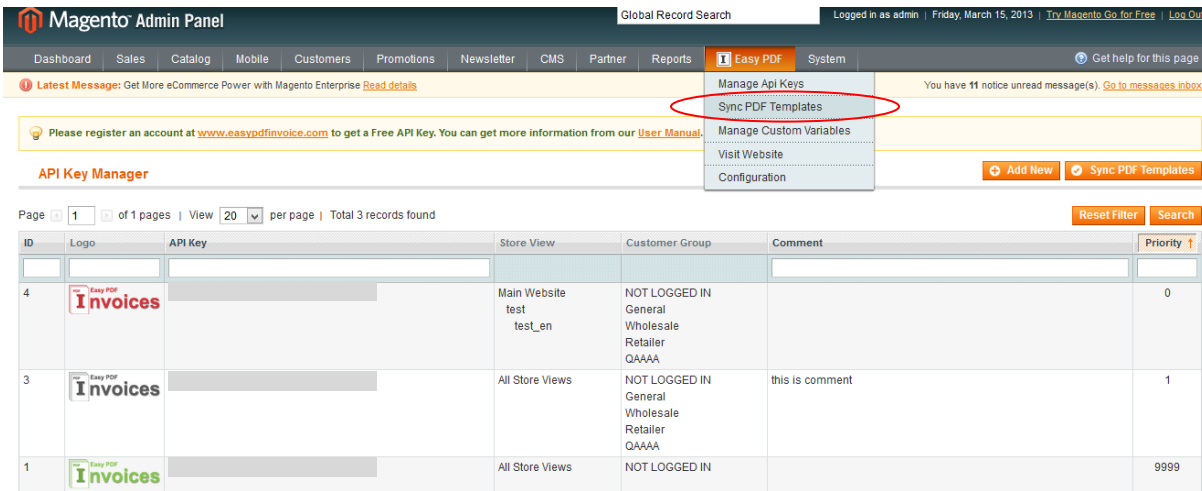

1 <div class="logo-container">{{var MY_LOGO}}</div>
2 <div class="invoice-header">
3   Order #{{var order.increment id}}<br />
4   {{var order.created_at_formatted.medium}}
5 </div>
6
7 <table class="tbl-info" cellpadding="0" cellspacing="0">
8   <tr valign="top">
9     <td>
10      <h3>Billing Address</h3>
11      {{var order.billing.formated}}
12     </td>
13     <td>
14      {{if order.shipping}}
15      <h3>Shipping Address</h3>
16      {{var order.shipping.formated}}
17      {{else}}
18      <h3>Payment Information</h3>
19      {{var order.payment_info}}
20      {{/if}}
21     </td>
22   </tr>
23 </table>
    
```

Click to that button and you will be asked to download a compressed file. Download that file and extract it. Upload all file and folder inside folder **PDF Template** to your magento root folder.

SYNC PDF TEMPLATE

Go to menu **Easy PDF -> Sync PDF Template**. wait for a minute to system sync PDF template from server EasyPdfInvoice.com to your local server.

Note: You need to add API keys which you got from easypdfinvoice.com before you use this sync function. You can see there is new field to upload your logo. this logo will be used on your PDF file.

The screenshot shows the Magento Admin Panel with the 'Easy PDF' menu expanded. The 'Sync PDF Templates' option is highlighted. Below the menu, the 'API Key Manager' section displays a table with 3 records.

ID	Logo	API Key	Store View	Customer Group	Comment	Priority
4			Main Website test_en	NOT LOGGED IN General Wholesale Retailer QAAAA		0
3			All Store Views	NOT LOGGED IN General Wholesale Retailer QAAAA	this is comment	1
1			All Store Views	NOT LOGGED IN		9999

Now All of your PDF template has been synced from easypdfinvoice.com server and store to your local server. Try to print now.

Note: You need to sync PDF template every time you modify PDF from easypdfinvoice.com
